

Overview

Quickly access recently looked up or saved vehicles by selecting “My Vehicles”.

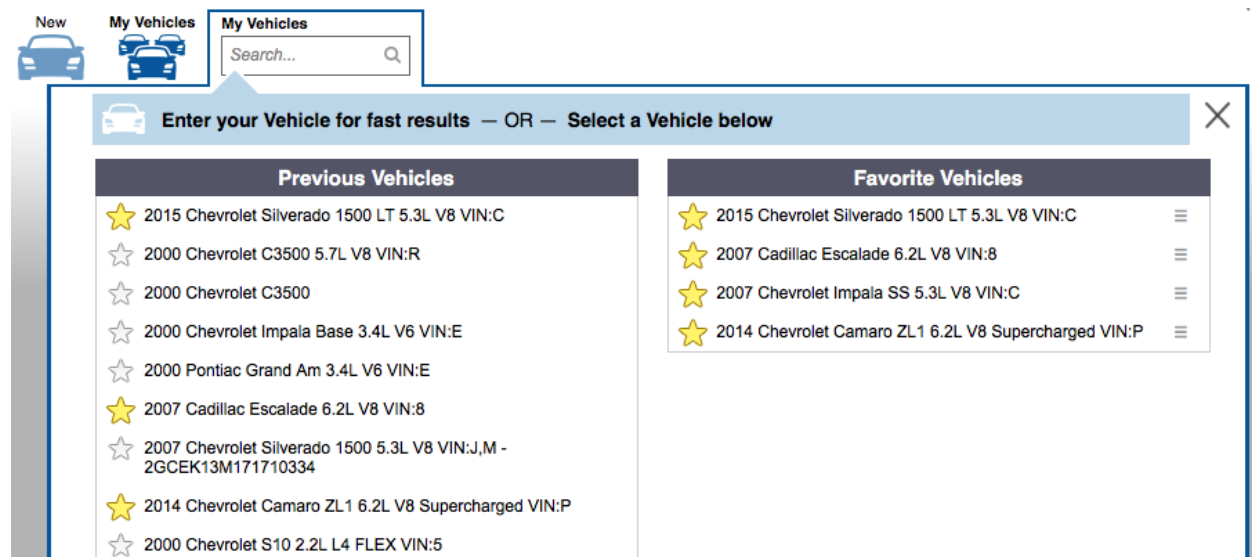

This feature is helpful for reoccurring customers or Fleets as the vehicle will be easy to find and accessed with a single click.

My Vehicles

This selection displays two lists, your last 20 vehicle selections and any vehicles you explicitly saved as favorites.

To select a vehicle, click on the vehicle description in the list. Once a vehicle selection is made, the selected vehicle will populate the vehicle bar replacing the current vehicle if one is already defined.

Adding a “Previous Vehicle” to “Favorites”

A “Favorites” star is displayed next to each previous vehicle displayed. This will provide you with the ability to add “Previous” vehicles as ‘Favorite vehicles” from this screen. Select the “Favorites” star next to a previous vehicle and the vehicle record will be added to the top of the Favorites vehicle list.

Managing Favorite Vehicles

You can reorder your favorites by dragging and dropping the vehicle using the “Grip” icon . You can remove a vehicle from your favorites list by un-selecting the “Star” icon .
